HUMOPRKIB 1604 bp mRNA linear PRI 22-MAR-1995
Homo sapiens (clone d2-115) kappa opioid receptor (OPRKI) mRNA,
complete cds.
L37362
L37362.1 GI:722617
OPRKI gene; kappa opioid receptor; opioid receptor.

                                                                                                                     ò
                                                                                                                                                                                                                                           ò
                                                                                                                                  The invention relates to an isolated variant allele of a human kappa opioid receptor gene, comprising a DNA sequence having at least one variation in a fully defined wild-type allele of human kappa opioid receptor (MCOR) sequence appearing a ADN30505, where the variation redector in the fully defined wild-type allele of human kappa opioid creceptor (MCOR) sequence appearing a ADN30505, where the variation comprises C852T, C948T, C1008T or their combinations. Also included are a isolated nucleic acid molecule selectively hybridishing to the variant, a cloning vector comprising the variant associated with a promoter, a cloning vector comprising the variant associated with a promoter, a unicellular host transformed/transfected with the vector and a commercial test kit for determining the presence of at least one variation in a hKOR gene of an allele in a bodily sample taken from a subject. The hKOR covariant allele is useful for determining a susceptibility in a subject to at least one physiological response, condition or disease related to the endogenous opioid system, learning, memory, cognition, pain, occaine, camphetamine and other stimulants self-administration, behavioural complete and alcohol withdrawal, physical dependence and tolerance; amphetamine and alcohol withdrawal, physical dependence and tolerance; camphetamine and alcohol withdrawal, physical dependence and tolerance; consurcendocrine function, reproductive function, productin regulation, stress responsivity, physiology and pathology of mood and affect, immune for determining a therapeutically effective amount of pain reliever to determining a therapeutic agent to pain in a subject and is useful for determining a therapeutic agent to amount of a subject in order to induce analgesia in the subject or moder to read the allele is useful for determining a therapeutic agent to determining a therapeutic agent to determining a therapeutic agent to determining a therapeutic agent to determining a therapeutic agent to determining a defendence and order to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    420
